EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Paul Bowen on 05/13/2010.

The application has been amended as follows:

Please rewrite Claim 29 to read as follows:

--A method for dosing additives, the method comprising:

providing a dishwashing machine having a washing container for handling of items to be retained and washed;

providing an arrangement that separately stores basic chemical products of an all-round additive product, independent of one another;

providing a dosing device operatively connected to the arrangement, to provide a dose of said additive product to the dishwashing machine; and

using the dosing device to selectively dose into the dishwashing machine the additive product in each of the following modes:

1) a first mode of dosing at least a portion of a selected one of at least one basic chemical product of the all-round additive product not used for clear rinsing; 2) a second mode of dosing at least two, but not all, of the basic chemical products of the all-round

additive product together; and 3) a third mode of dosing at least one reaction mixture consisting of the basic chemical products of the all-round additive product.--

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: The reviewed prior art does not disclose or render obvious a dishwashing machine with a dosing device operable to add into the dishwasher each of the dosages as required in the instant claims. It is noted that the dosing device, as claimed, is operable to selectively dose any and each of the listed modes, as desired. It is further noted that while the dosing device is capable of providing each of the listed dosages, it is understood that only a single mode is intended to be performed at a time., i.e., the modes are not performed simultaneously.
3. The closest prior art of record is Reichold et al. (US 2003/0127110), Holmes et al. (US 3,756,457).
4. Reichold teaches a dishwashing machine and method in which basic chemicals of an all-round additive product are separately stored to be independently added into a dishwasher. Reichold teaches that at least a portion of at least one of the chemicals may be added in top the dishwasher. Reichold also teaches that the system may dispense product on an as-needed basis depending on condition of the washing solution.
5. Holmes teaches a dishwashing machine comprising a dual feeder to provide means of feeding additives from a pair of additive reservoirs into the water supply of the

dishwashing machine. This system allows at least two dishwashing additives in liquid form to be injected into a common water supply for delivery to the dishwashing machine. The additives are mixed in a mixing chamber prior to reaching the dishwashing machine.

6. The prior art does not teach a method for- or system capable of- providing each of the claimed dosages. Specifically, neither Reichold nor Holmes teaches dosing at least two, but not all of the basic chemical products of an all-round additive product together through micro-reactor to a washing chamber. Further, they do not teach a method or system for dosing a reaction mixture consisting of the basic chemical products of the all-round additive, as presented in the claims.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to NATASHA CAMPBELL whose telephone number is (571)270-7382. The examiner can normally be reached on Monday-Friday; 9 AM-5 PM.

9. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Kornakov can be reached on (571) 272-1303. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
